ABOUT OUR INTERNSHIP PROGRAM:

We have a number of interns who join our program and who come to us from many different countries. We do not put out any fixed rules or information regarding our internship program since each intern who comes here needs to do something different, it depends on which College or University you attend, what you are studying and what your requirements therefore are.

There are 2 types of interns who join our program:

- those who simply want to shadow and work with our curators on a day to day basis with the various animals and
- those who require specific research topics and/or specific assignments.

Depending on your requirements and therefore whether we are able to assist you, we will arrange your program for you specifically. *Therefore, before we confirm your placement with us, we would need to know exactly what your specific requirements are (any assignment would obviously also depend on which animals are available at the time of your internship)*

ABOUT YOUR COLLEGE/UNIVERSITY:
